

What would Jesus say to us today?

If Jesus truly has all power in Heaven and on Earth, what would prevent him from speaking to us today? If the Gospels were spoken by Jesus through human messengers, what is to prevent Jesus from using a human messenger to speak to us today? Are you willing to consider what Jesus would say to us today about the following questions:

- **Is it possible that for almost 2,000 years mainstream Christians have overlooked or misinterpreted the true, inner message that Jesus came to give us?**
- **Is it possible that the Christian faith has been influenced – in subtle and generally overlooked ways – by the consciousness of anti-christ?**
- **Is it possible that Christians have been misled into preaching as gospel based on fear instead of a Gospel based on the perfect love that casts out fear?**

These are serious questions and they deserve serious consideration instead of a quick dismissal based on outer doctrines or customary beliefs. If the early followers of Jesus had not been willing to look beyond their orthodox beliefs, how could they have followed Jesus when he appeared in the flesh? If you are not willing to look beyond your existing beliefs, how can you follow the Living Christ today?
